SKILLS

JavaScript, TypeScript, React, Ruby, Ruby on Rails, HTML, CSS

EXPERIENCE

Quipper Ltd

Lead Software Engineer / April 2020 - Present

Software Engineer / October 2015 - March 2020

- Updated legacy APIs to meet response time and error rate service level objectives
- Led a team of five engineers to modernize and improve user and developer experience of a content creation application by migrating from BackboneJS to React, Redux and TypeScript and updating the existing Ruby on Rails API while maintaining full backwards compatibility with existing content and features
- Remote core engineer in a four-person team that built a new version of a student learning application using React, Redux and TypeScript communicating with a Ruby on Rails API
- Led a two-engineer team to improve the payment rate of Indonesian market by implementing in-app payment process
- Mentored other engineers and on-boarded new ones to ensure they become comfortable with the codebase and productive as quickly as possible
- Worked on integrating third party payment processors to handle user payments from the Philippines and Mexico
- Wrote end-to-end tests to ensure interoperability of student and teacher applications using Capybara and BrowserStack to replace internal weekly manual QA testing
- Refactored landing pages for Philippines, Indonesia and Mexico to accommodate country-specific promotions and use internal CSS library to clean up custom CSS and improve maintainability

Codeflux Inc

Software Engineer / November 2012 - September 2015

- Implemented accounting system features and reports (spreadsheets, PDF, and printed)
- Optimized slow application SQL queries
- Worked closely with business analysts and clients during UATs, demos and application maintenance
- Built CRUD pages for a quotation engine and inventory system

CritterMap Software

Junior Android Developer & Technical Support / May 2011 - February 2013

- Implemented use of external storage volume, one of the most requested feature for the application
- Improved user experience by organizing settings and menus and modernizing the application navigation bar to follow Android best practices and patterns
- Created and maintained comprehensive user guides, knowledge bases, FAQs and tips
- Provided fast turnaround and thorough support and problem resolution to customers
